

## Battery Capacity (mA) Selection for OM-Gryphon V4

This parameter allows to define both the Charging Timeout (130% of the capacitance) and the Low Charge phase current equal to 10% of the capacitance.

<u>Battery Capacity (mA)</u>	<u>Command RE xx</u>	<u>Charge Timeout (min)</u>
1500	 \$+RE30\$-	156
1850 (Default)	 \$+RE37\$-	192
2100	 \$+RE42\$-	218
2300	 \$+RE46\$-	239
2500	 \$+RE50\$-	260

To use this new commands, it is necessary that you have the following firmware release:

GRYPHON M100 SOFTWARE RELEASE 3.1.1 23/12/2004

GRYPHON M200 SOFTWARE RELEASE 3.1.1 23/12/2004

OM-GRYPHON SOFTWARE RELEASE 4.00.01 19/04/2005
